The aim of education should be to
teach us rather how to think, than
what to think—rather to improve our
minds, so as to enable us to think for
ourselves, than to load the memory
with thoughts of other men.

Drive your city green

Your city has everthing but trees.

The trees are essential for clean

environment. Thus clean environment

needs green environment. Each citizen

should plant a tree in the empty space

before his house. He should look after

it and let it grow up. The greenness will

Population Problem

Population problem is a major problem of India. There is no increase in our resources. But there is a regular increase in our population. Our roads have more traffic. There are more men on the same land. We will have to make more schools, more hospitals and more essential things for the growing population. If we do not check this problem, poverty will soon overtake us.

Sun

The sun is a huge ball of gases. It has a diameter of 1,392,000 km. It is so huge that it can hold millions of planets inside it. The Sun is mainly made up of hydrogen and helium gas. The surface of the Sun is known as the photosphere. The photosphere is surrounded by a thin layer of gas known as the chromospheres. Without the Sun, there would be no life on Earth. There would be no plants, no animals and no human beings. As a result, all the living things on Earth get their energy from the Sun for their survival.
